

natural inducer

3-β-D-galactosyl-*sn*-glycerol

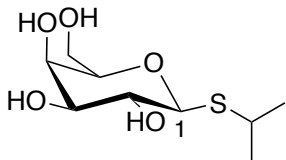

inducer used in laboratory

lactose = β-D-galactosyl-(1→4)-D-glucose

active isomer formed *in situ*

allolactose = β-D-galactosyl-(1→6)-D-glucose

non-hydrolyzable analog used for protein overexpression

IPTG = isopropyl β-D-1-thiogalactoside
